**Title: 42 Years of Academic Life: Stochastic  
Dynamical Systems, SDEs, and SPDEs**

**Abstract:** We report on snapshots of 42 years of academic life and related contributions to stochastic dynamical systems, stochastic difference equations, stochastic ordinary and partial differential equations (SDEs and SPDEs). The topics are illustrated by numerous figures, touching a series of disciplines of science and mathematics (such as waves, beams, heat, circuit, response analysis of structures, stock market, innovation or epidemic modeling).
